

VICENTE NAVAS MARTÍNEZ

COMPUTER SCIENCE ENGINEER

PROFESSIONAL PROFILE

Computer Engineer with solid training in hardware architecture and backend development. With great ability to analyze complex problems and find ways to solve them. Passionate about leading teams, having managed to bring out the best in all the group projects I've been involved with during my degree.

EDUCATION/DEGREES

Degree in Computer Engineering

Universidad Rey Juan Carlos

09/2022 – Present

- Endorsed by the international EURO-INF quality seal.
- With distinction (highest honors) in:
 - Artificial Intelligence
 - Embedded and Real-Time Systems
- Pending internships and final degree project in the 2026-27 course.
- From 02/25 to 06/25, I participated in the Erasmus program at VIZJA University, Warsaw, Poland

C1 Advanced Certificate (Cambridge English)

13/12/2025

Scientific Baccalaureate

IES Alfredo Kraus

09/2020 – 07/2022

SKILLS

Languages

- English (Advanced)
- Spanish (Native)

Technical Skills

- Hardware: Von Neumann architecture (CPU, cache/virtual memory, I/O, buses), MIPS/assembly and advanced parallelism (superscalar, SMP/NUMA, CUDA GPUs)
- Software:
 - Frontend: HTML
 - Backend: Java, Python, C++, C, Scala
 - Databases: SQL ANSI (MySQL, oracle and SqlServer)

PROFESSIONAL EXPERIENCE

IT Teacher for Kids

Colegio Nueva Castilla

09/2023 – 07/2024

PERSONAL INFORMATION

Date of birth: 13/07/2004

Address: Travesía De Capri 5, Madrid, Spain

Phone: +34638270132

Email:
vicente.navas.martinez@gmail.com

SOME INTERESTING PROJECTS

Big Data Analysis

I developed shared memory parallelism applications (OpenMP), distributed cluster computing (OpenMPI), and GPU acceleration (OpenACC)

Web Application Analysis, Design, Implementation, and Evaluation

- HTML development with prototypes, evaluation with real users, and data-driven redesign.
- Team leadership during the 5 months of work.

Thread management for real-world examples

I developed a vaccination simulator in C to manage real situations.

Complete Game Developed in Java

I developed a complete Minesweeper game with its full ecosystem, including an interactive GUI, role systems for players and administrators, and persistent rankings connected to a MySQL database via JDBC connector.
